colors:

Brand color - #6563ff

#76B8FF - hover and active effects on links

#5048cc - Secondary Color for border

#000 - for text

Typography:

TypeScale	Size	line height
Header1	42 px	63 px
Header2	36px	54px
Normal text	20 px	30 px
Tiny text	16 px	24 px

components:

Guidelines:

- Use Inter for all text.
- Ensure all interactive elements meet WCAG 2.1 AA contrast requirements.
- Apply consistent spacing and margins to maintain alignment.
- Design for mobile-first (start with the smallest screen size).
- Keep visual hierarchy clear by using font size, weight, and spacing strategically.
- Remove unnecessary elements to reduce distractions and improve focus.
- Using the Dark Gray (#202124) color for textual content.
- Apply a 12-column grid layout to maintain alignment.
- #007BFF - brand color
- Ensuring contrast for readability (e.g., white text on bright blue background).

About me

My introduction

Passionate about technology, I am a full-stack developer with experience in creating dynamic, user-centered web applications. Driven by a curiosity for solving complex problems, I continuously seek opportunities to grow and innovate, blending both front-end and back-end expertise. Whether building seamless user interfaces or architecting robust server-side solutions, I am dedicated to delivering high-quality, scalable products.

Software Engineering student
Addis Ababa University

Data Structures and Algorithms
Google Developer Student Clubs

Computer Simulation Certification
Addis Ababa University
